

Defend Your Rooftop From Grease With

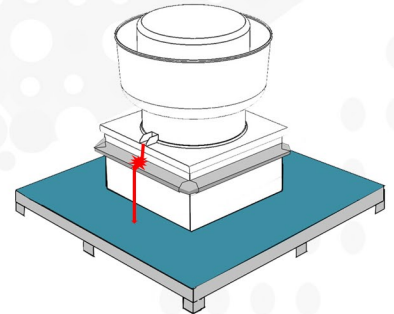

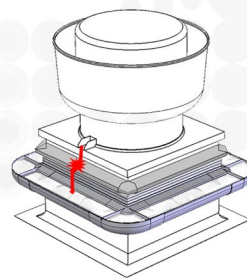

Off The Roof
Protection

CURB DEFLECTOR

KEEPING GREASE OFF YOUR CURBS & ROOFS

Omni's **Curb Deflector** mounts below the fan base between the fan and grease containment unit. The **Curb Deflector** deflects grease away from the fan curb out onto filter media of a **Grease Gutter** or **Roof Guardian** grease containment system. It also prevents grease from running down a fan curb and possibly passing between a grease containment unit and fan base and onto a roof. By intercepting and diverting grease discharge off of a fan curb, the **Curb Deflector** prevents costly fan curb rebuilds

- Weather Resistant
- Quick & Easy to Install
- 3 Stock Sizes (Custom Sizes Available)
- Made from Sturdy 22-Gauge Galvanized Steel
- Easily Retrofits into Existing Grease Containment Units
- Helps Center Grease Discharge onto Filter Media for Even Absorption
